

I'll give you **multiple types of tables with code**, each with a unique design and a comedic flavor.

1 Classic Striped Table – “The Office Worker”

```
<table style="width:50%;border-collapse:collapse;font-family:sans-serif;"> <tr

<button onclick="toggleTable()">Show/Hide Table</button> <table id="collapsible"
style="width:50%;border-collapse:collapse;margin-top:10px;"> <tr

```
function toggleTable() { var table = document.getElementById("collapsible");
